WORK EXPERIENCE

Tech Lead, Front-End Web Developer HalfSerious

04/2023 - 06/2024

Montréal, Canada

Tasks

- Architected a fleet management application using Angular 16 and MapBox GL, ensuring scalability and maintainability for long lasting development.
- Made informed decisions regarding the adoption and removal of development tools, ensuring alignment with client improving overall workflow efficiency.
- Implemented a rigorous code reviewing process utilizing unit testing, GitHub and Chromatic, reducing production errors.
- Integrate LaunchDarkly for feature flags management, enabling seamless feature rollouts and minimizing deployment risks.
- Support on a SAAS and UI Toolkit project in React 18.2.

Front-End Web Developer Poka Inc.

11/2021 - 10/2022

Montréal, Canada

Tasks

- Maintained an Angular 14 SaaS and develop new features using LaunchDarkly for feature flags.
- Collaborated with the embedded designer to make the app behave as intended.
- Made diligent code review with Jest and the collaboration of the embedded QA tester.

Team Lead Front-End Web Developer MG2 Media

07/2015 - 04/2020

Montréal, Canada

A website design and integration company with an in-house content management system

Tasks

- Lead a team of 5 to 8 programmers, onboarded and supervise new hires and participate in their continuous improvement.
- Mentored junior developers, providing guidance on best practices and promoting a collaborative culture.
- Integrated websites based on provided designs using the in-house CMS with XSLT 2.0 and JQuery.
- Designed and implemented tools for the in-house CMS, significantly reducing redundancy in tasks and optimizing the development process.
- Added reactivity on certain projects with React to add SPA behaviour.
